

CSS Styling Class Activity: Personal Blog Enhancement

Learning Outcomes

- ✓ Understanding how CSS styles HTML elements
- ✓ Writing CSS step by step and linking it to an HTML file
- ✓ Using selectors, properties, and values to style text, backgrounds, and layouts
- ✓ Organizing web files correctly
- ✓ Practicing Canvas file submission

Step 1: Create and Link a CSS File

1. Open VS code Editor and navigate to your **Personal Blog HTML file**.
2. Add the following **inside the <head> section** to link an external CSS file:

```
<link rel="stylesheet" href="styles.css">
```

3. Create a **new file**.
4. Save it as **styles.css** inside the same folder as **PersonalBlog.html**.

Step 2: Style the Page Background & Font

Open `styles.css` and start by styling the **entire page**: Use font-family: Arial, sans-serif, background-color, margin and padding

Step 3: Style the Blog Header & Navigation Bar

1. Add a background color to the **header (h1 title)**:

Style the navigation bar

Step 4: Style the Profile Image

1. Add CSS to make the **profile image rounded and centered**:

Step 5: Style the Fun Facts & Blog Section

1. Style the **h2 headings**:

Step 6: Style the Footer

1. Add CSS for the footer to give it a **dark background with white text**:
